

SONIC
SYSTEMS

Managed IT • Cloud Services • Business Phones

Your entire technology team, with one phone call.

Your patients need your attention. Your technology shouldn't have to. Keep your practice moving with one team looking after your computers, network, backups, security, and phones, and handling the vendor calls along the way.

IT-only

Complete technology care for your practice, from computers, networks, and security to backups and EHR/EMR support.

Phones-only

Help patients reach the right person with SonicVoIP call queues, ring groups, and after-hours routing.

IT + phones

One team for your IT and phones. Choose either service on its own or bring both together in one monthly plan.

EHR & EMR PLATFORMS

Complete technology care.

- One phone call connects you with an expert team, without hiring an in-house IT department.
- Proactive maintenance helps catch problems early and prevent interruptions to your day.
- Emergency help is available 24/7/365, so you have someone to call when it matters.
- A predictable flat monthly rate tailored to your needs makes budgeting simpler.

On-site support.

Serving medical practices across the High Desert and Southern California.

More time for patients. Less time managing technology.

Make our team part of yours. Call us when a computer slows down, a phone stops working, or your EHR/EMR needs attention. We troubleshoot the problem and work with your software and service vendors, so you don't have to chase answers.

We work with you to plan upgrades, protect your systems, and provide assistance completing the technical sections of HIPAA and cyber-insurance forms.

AI & Workflow Automation

Put practical AI and automation to work for your practice. We select and connect practical tools with you to reduce repetitive administrative tasks.

The only call you need to make.

We'll tailor a technology solution to your practice, with predictable monthly pricing.
